संदेश

आप सभी रेलकर्मियों को पूर्व रेलवे के कार्यकारी समय-सारणी के इस नए-संस्करण के प्रकाशन पर हार्दिक बधाई। 01 जनवरी, 2026 से प्रभावी नए कार्यकारी समय-सारणी का उद्देश्य रेल कर्मचारियों को गाड़ियों के समयपालन एवं संचालन में सहायता प्रदान करना है। मुझे आशा है कि यह संशोधित कार्यकारी समय-सारणी पुस्तिका गाड़ियों के संचलन एवं समयपालन में अत्यधिक सहायक, तथा सभी रेलकर्मियों को दक्षता से कार्य निष्पादन में सहयोगी सिद्द होगी। इसमें दिये गये नियमों के अनुपालन से गतिशीलता तथा रेल यात्रियों की सन्तुष्टि में अपेक्षित वृद्धि होगी।

मैं परिचालन विभाग सहित, रेल संचालन से जुड़े अन्य विभागों को इस प्रयास के लिए बधाई देता हूँ और उम्मीद करता हूँ कि सभी रेलकर्मी यथासमय इसके सदुपयोग से लाभान्वित होंगे।

आप सभी के उज्ज्वल भविष्य और सफल कार्य निष्पादन के लिए मेरी शुभकामनाएँ!

दो शब्द

प्रिय साथियों,

पिछले वर्षो की भाँति, इस वर्ष भी पूर्व रेलवे के चारों मण्डलों की कार्यकारी समय-सारणी 2026 के अवलोकन के अवसर पर आप सभी को हार्दिक बधाई।

पूर्व रेलवे ने वित्तीय वर्ष 2024-25 में 100 मिलियन टन लोडिंग लक्ष्य सफलता पूर्वक प्राप्त किया है। पिछले वित्तीय वर्ष में, 100.87 मिलियन टन की लोडिंग तथा 111.56 मिलियन टन का अनलोडिंग दर्ज की गई।

यात्री सुविधाओं में निरंतर वृद्धि करते हुए कुल 16 नई मेल एक्सप्रेस एवं 14 पैसेन्जर गाडियाँ का शुभारम्भ किया गया, जिसमें 06 वंदे भारत की सेवायें भी सम्मिलित है।

इसके अतिरिक्त, कुल 08 गाड़ियों को एल.एच.बी कोचों में रुपान्तरित किया गया, 4606 अतिरिक्त कोचों, 5333 विशेष गाड़ियों का संचालन तथा 20 गाड़ियों विभिन्न स्टेशनों पर अतिरिक्त ठहराव प्रदान किया गया।

वर्तमान वर्ष (अप्रैल-नवम्बर, 2025 तक) में अबतक 62.37 मिलियन टन लोडिंग तथा 71.9 मिलियन टन अनलोडिंग की जा चुकी हैं। इस दौरान 09 गाड़ियों को एल.एच.बी रुपान्तरित, 1417 अतिरिक्त कोच, 4260 विशेष ट्रेनों का संचालन तथा 52 गाड़ियों को अतिरिक्त ठहराव प्रदान किया गया। 43 उपनगरीय सेवायें सहित 63 नई यात्री सेवायें का शुभारंभ किया जा चुका है, जिसमें 10 वातानुकूलित ई.एम.यू की सेवायें, 02 अमृत भारत एवं 02 राजधानी एक्स. सम्मिलित है।

इस वर्ष हमारी समस्त यात्री गाड़ियों का समयपालन 84.9 प्रतिशत रहा जो कि पिछले वर्ष की तुलना में 0.4 प्रतिशत अधिक है।

सुरक्षा, संरक्षा तथा समयपालन परिचालन का आधारशिला है, अत: इसको सुनिश्चित करना हम सभी की सर्वोच्च प्राथमिकता होनी चाहिए। इसके लिए संचालन संबंधी नियमों एवं निर्देशों की समुचित जानकारी रखते हुए उनका पूर्ण निष्ठा से पालन किया जाना आवश्यक है।

अत: मुझे पूर्ण विश्वास है कि हम कड़ी मेहनत, स्व-अनुशासन, आपसी सहयोग एवं दृढ़ निश्चय से रेलवे तंत्र को सुदृढ़ एवं जनोपयोगी बना सकते हैं।

अंत में, आप सभी से अनुरोध है कि समय-सारणी में किसी भी त्रुटि या भूल मिलने पर अतिशीघ्र सूचित करें एवं इस कार्यकारी समय-सारणी का पूर्णत: पालन करें।

शुभकामनाओं सहित !

(सौमित्र बिश्वास)
प्रधान मुख्य परिचालन प्रबंधक
पूर्व रेलवे, कोलकाता।

Golden Hour

If a critical trauma patient is not given definite medical care within one hour from the time of accident, chances of his ultimate recovery reduces drastically, even with the best of Medical attention thereafter. This one hour period is generally known as "The Golden Hour".

During this Golden Hour period every effort should be made to :

1. Render definite medical care to the extent possible preferably by qualified medical practitioners.
2. Stop bleeding and restore Blood Pressure.
3. Persons under shock should be relieved of shock immediately.
4. Take injured person to the nearest hospital so as to reach within this Golden Hour period.

For being effective, any Disaster Management system should aim at recovering as many critical patients as possible and rushing them to hospital within this period.

3. In exigency, in case the train is required to run on any line other than specified vide Item No. 2- a generic special restriction of 15 kmph. will be applicable while passing through any platform line.
Maximum Permissible Speed will however remain 110 kmph. subject to observance of maximum permissible sectional speed, whichever is less.

Demarketed signs used in the Working Time Table.

SIGNS	DENOTES	SIGNS	DENOTES
A,B or C	Class of Stations	**RI**	Rudimentary Interlocking.
Spl	Special Class of Station.	**MACL**	Multi-aspect Colour-light signalling.
D	D Class of Station without Siding.	**CW**	Carriage Watering Station.
DK	D Class of Station with one or more siding key locked and non-interlocked.	**HL**	High-level platform.
		LL	Low-level platform.
SKL	Siding-Key locked.	**ML**	Medium level platform.
RRI	Route Relay Interlocking.	**RL**	Rail level platform.
I,II,III	Standard of Interlocking.-(Std.I,II or III)	**PTT**	Public Time Table (Departure)

Time allowance for Temporary Engineering Speed Restriction, Traffic Recovery Time and operational Time on each train are indicated as under.

i. Temporary Engineering Speed Restriction : **E** followed by numerical digit (digit indicates the time allotted in mts.)
ii. Traffic Recovery Time : **T** followed by numerical digit (digit indicates the time allotted in mts.)
iii. Operational Time : **OP** followed by numerical digit (digit indicates the time allotted in mts.)

Instructions for Loco Pilots :-

Loco Pilots shall run the Trains at Maximum permissible speed subject to observation of other speed restrictions in force.

Controlling Officials,—Juridiction of controlling Station Masters for stations on the Asansol Division—

Controlling Station Supdt.	Jurisdiction
Durgapur	Waria (inclusive) to Rajbandh (exclusive) including all aidings.
Panagarh T.S.	Panagarh (inclusive) to Galsi (exclusive) including Panagarh Military Base.
Raniganj	Baktarnagar to Nimcha (inclusive) and all sidings.
Sitarampur	Barachak (inclusive) to Jamtara (inclusive) Barbani Loop (Sitarampur to barabani) Sitarampur to Kulti (inclusive) and all sidings.
Barakar	Barakar (inclusive) to Chhota Ambona (inclusive) and all sidings.
Madhupur	Jantara (exclusive) to Madhupur (inclusive) and MDP-Giridih Branch.
Jasidih	Sankarpur (inclusive) to Jhajha (exclusive) including Baidyanathdham & Dumka Branch.
SS/UKA	KJME (incl.) to UKA (incl.) including all traffic L/C gates & Collery Sdgs.
SS/PAW	PAW (incl.) to DUJ (excl.), BMGA-PSME all colliery & Sdgs.
SS/Suri	DUJ (incl.) to KNRI (incl.)

(a) Spring Points— ASN New Receiving yard

Slip Sidings—

Slip sidings are provided to prevent vehicle escaping from a station situtated on a grade so that block sections is not obstructed if any vehicle runs away from the stations.

At Kajoragram— Kajoragram Slip Siding on the East and West lines at Andal end.

At Barabani— Barabani Slip Siding off the South and North lines at the Sitarampur end.

Ballast Sidings—

(1) Two sidings are situated between Mahesmunda and Jagadishpur with points facing for Down trains at 192/4910 feet and 195/2612 feet.

(2) At JSME, VDS, KEE and MNC—The ballast siding at JSME and VDS are used for loading and unloading of PWI materials. Two ballast adding WME is also to be used for the purpose of stabling of rakes and other goods wagons—when no room is available in Goods shad.

White Buffer Lights—

At stations where red buffer lights may confuse the drivers of running trains when starting or leaving the station, white buffer lights are provided in accordance with SR 5.14 (d) (ii).

At Station	Location
Barakar	At East Shunting Neck.
Madhupur	At Shunting Neck of Giridih end.
Raniganj	At the West end buffer of Coal Siding.

Crossing Precedence Facilities and Loop Capacity—The following stations have no Loop and trains cannot be crossed as given precedence to at these stations—

(i) From Khana (exclusive) to Asansol (exclusive). On this quadruple line section there are no loops except at Paraj(DN), MNAE(DN), Panagarh(UP & DN), Rajbandh (DN), Durgapur (UP & DN), Waria (UP & DN), Andal (UP & DN), Raniganj (UP), Kalipahari (UP & DN). Trains can, however, be given precedence by diversion from Main Line to Slow Line in both Up and Down directions except at Nimcha Block Hut.

(ii) Asansol-Pradhankhunta—Loop lines provided at MMU, CAM,BRR, KAO & PKA in both UP & DN direction.

(iii) Sitarampur-Jhajha—(a) In UP Direction there is no Up Loop at Bodma, Kaseetar, Madankata, Nawapatra, Tulsitanr and Narganjo.

(b) In down direction there is no Loop at Narganjo, Ghorparan, Lahabon Sankarpur, Mathurapur, Nawapatra Joramow, Madankata, Kaseetar, Bodma and Rupnaraynpur. As such no precedence is possible at these stations.

Turn Tables— Nil

Carrige Watering Stations—

For Main Line and Grand Chord Line Trains—At ASANSOL P.F.

For Branch Line Trains—At UDL, MDP and JSME.

Engine fueling facilities on the Division—

Diesel—

Andal—Diesel Shed

Automatic signalling territory between Sitrarampur and Pradhankhunta—The Automatic signalling tarritory extends from STN to CAM on the Grand Chord Section—

(a) Attention of all Guards and Drivers is drawn to General and Subsidiary Rules 9.02 for guidance.

(b) Semi-Automatice signals shuld be treated as stop signals and must not be passed in "ON" position without proper authority. These semi-automatic signals are to be treated as Automatice signals and may be passed in the "ON" position, under G.R. 9.14 only when the itencilled "A" marked is lit.

(c) List of Semi-Automatic signals between Sitarampur and Chhota-Ambona is indicated bellow separately for Up and Down trains.

"Automatic Stop Signal Faliures Reporting Station—

(a) Up Trains—Mail and Express train with stopage at Barakar to report the failure between Sitarampur and Barakar.

Mail and Express train having no stopage at Barakar should report failures at Dhanbad.

Passengar trains should report failures at the first stopping Station.

(b) Down TrainsSemi-Automatic—Mail and Express trains between Chhota Ambona-Barakar with stoppage at Barakar should report the failure at Barakar.

Mail and Express trains having no stoppage at Barakar should report failures at Asansol.

Passenger trains should report failure at the first stopping station.

(ii) For Goods trains—

(a) Up Trains—The goods trains should stop and report the failure at Dhanbad or at any station on road.

(b) Down trains—The goods trains should report the failure at Asansol or at any stations of termination.

List of Notice Stations

List of Notice and Intermediate Originating stations for the purpose of Serving Caution of Orders—

Division	Notice stations	Intermediate Originating Stations
Asansol Division	1. Asansol Jn 2. Madhupur Jn. .	1. Panagarh 2. Durgapur 3. Waria 4. Andal Jn. 5. Ukhra 6. Pandabeswar 7. DSEY 8. Siuri 9. Tapasi 10. Sonachara 11. DCOP 12. Hirapur 13. Giridih 14. Special Instructions for local trains Mail, Goods, Banking, Coal Pilots, motor trolleys, Neutral Section, etc.

Local Trains—The following local trains, which serve the daily commuters should as far possible, be given a clear run—

(a) 63509 Up BWN-JAJ MEMU.

(b) 63511, 63525 BWN-ASN MEMU.

(c) 63512, 63514 ASN-BWN MEMU.

(d) 63570 BDME-ASN MEMU.

(e) 63561 ASN-JSME MEMU.

(f) 63542 GMO-ASN MEMU.

(g) 63530 RPH-UDL MEMU.

(h) 63531 UDL-SNT MEMU.

Special Instructions for gradient Sections—(1) Ghorparan-Jhajha Up Trains—

There is a heavy falling gradient for up trains between Ghorparan and Jhajha on Sitarampur-Jhajha section.

(i) If the brake power required for Hill section as diccussed in Chapter 3D-2 is not avaible or if the driver doubts the evident for adequacy of Brake Power, the Driver must stop at Ghorparan and Pin down or screw sufficent number of hand brakes to ensure control over the train, down the gradient.

Hand Brakes will be pinned down on screwed on piped vehicles only. Should there not be a sufficent number of train pipes vehicles on the train to permit of the requisit number of brakes being pinned down. Guards are warned, that under no circumatances are they, on their own authority to pin down any etive fitted vacuum wagons, as by doing so they will be deprving the Driver, of a certain amount of brake power. The Driver will assist the guard in pinning down the brakes and indicate non-active vehicles, whose brakes may be pinned.

Notes—A check board has provided at K.M. 338/3-4 just after passing Lahabon in MDP-JAJ Section for the Drivers of Up Goods trains to conduct test checks of the brake power in their trains.

. BANKING OF TRAINS

At Jhajha-Simultala Down trains

(a) Passenger trains—

The loads of Down Mails/Exp. Pass Train from Jhajha to Simultala. When workes by WDM-2 Load shall not Exceed 18 bogies unless banked.

No Bank pilot is required for M/Exp. train both UP and DN upto 24 coaches worked by electric locos. Banker is required for loaded goods train in DN direction between JAJ-STL for all types of loco in fair weather condition.

The speed of trains should not exceed 65 Kmph. between GHN-STL with Banker.

(b) Goods Trains—Loads of Goods Trains hauled by different types of Locos on Jhajha-Simultala Section with-out a banker and with a banker of different types shown bellow—

Types of Loco	Load/ without Banker (Tonnes)	Load with one Banker/ (in Tonnes)		
		Class of banking Engine		
WDM-2	1488	—with— WDM2 WDM2		2020 3400

When working without Bankar the train should run through from JAJ to STL.

ASN

BANKING OF TRAINS

Rules to banking of trains between Jhajha-Ghorparan-Simultala—

When a banking engine is attached its hose pipe/ break pipe will not be coupled up. The Bank Pilot Driver shall use his engine brake only in accordance with the signals from the Train. In case of a passenger train, when a bank pilot driver is required to be attached. The Bank Pilot Driver will record the amount ofvacuum available in the Guard's van, whereafter he will couple up the vacuum hose pipe and open the same ejectors Steam cock sufficient to maintain the amount of vacuum that was available in the Guard's van.The train engine should small ejector steam cock 'suficiently to maintain the requisite amount of vacuum.

COAL PILOT WORKING RULES

For WAG5 & WAG7

(a) Load Ex. UDL by WAG 5 loco should not exceed 3500 tonnes.

(b) Load Ex. UDL by WAG 7 loco should not exceed 4800 tonnes.

Coal Pilot—Detailed Coal Pilot Working Rules, which have been circulated seperately, must be studied and followed in the interest of safety. Special features of certain pilots are however, given below for general guidance—

(i) Where two or more engines work as pilot and they have to be separeted in the section, it should be clearly understood between the Guards or and Shunting staff as to where the engines have to join and how.

Topsi Pilot—On the Barabani-Tapasi Chord section Driver of Down coal pilot must pin-down or screw the hand brakes or 25% wagons before starting from the pin. Down Board' provided near Achalpur siding just after passing the Rasuldanga Road of bridge.

Salanpur Pilot—When returning from Salanpur to Sitarampur the hand brake level of one third of the total number of wagon (loaded or empty) should be pinned-down of arround hard before leaving Salanpur.

Giridih Pilot—Brake Van brakes can be used to help to control load. When two engines are used one must be at each end of the load.

Chanch pilot—In laikdih siding engine must be both infront & in rear.

Chara Pilot—When a load of down Sonachara Coal pilots start from Parasia controlled by shunt Signal.

Stoppage at the down outer Signal must be entered in the JTR by the Guard/Driver.

Coal and outlaying Siding—

List of outlaying sidings taking of the Main Line. Grand Chord and different Branch Line Sections are given below. The points of these sidings are provided with key latch and the speed when passing over the facing direction is restricted to 48 Kmph. The Coal Pilot Working Rules must be carefully observed when working these siding.

Note—(i) The Chief Engineer under his office letter No. W.352/5/3, dated 26th December 1977, has permitted running WDM-1 and WDM-2 Class of locomotives in regular goods servions on the under noted colliery industrial sidings subject to the conditions stipalated in the Joint Safety Certificate Nos. 180, 181 and 182 (to be locally notified).

Note—(ii) The Chief Engineer under has office letter No. W.352/5/3, Vol. 2, dated 2nd February 1978, has permitted running WDM-1, WDM-2 and Class of locomotives in regular goods service on the under noted colliery industrial sidings subject to the conditions stipulated in Safety Certificate Nos. 225, 226, 228 and 229 (to be locally notified).

RULES FOR MOTOR TR.OLLEY WORKING

Motor Trolleys must run with line clear or following a train but at the personal responsibility of the official to whom the trolley is allotted or to whom it is temporarily alloted for use.

In Automatic Signalling territory also the Motor trolleys should run on line clear which may be obtained on telephone by exchange private number.

Motor Trolley following trains is prohibited on tokenless block working section on single line and also on ghat and graded section on double line where view is not clear.

Normally Motor Trolleys shall not run between sunset and sunrise.

At night or when visibility is impaired by fog, dust, storm, etc. motor trolleys should not run. But in emergencies like accidents breaches, etc., it becomes necessary to run the motor trolley at night or when visibility is impaired the motor trolley shall be allowed to run, only if provided with head light, Particular care will be necessary at level crossings to avoid accident with road traffic.

When passing through curves and cuttings or where view is otherwise obstructed the motor trolley shall be protected by trolleymen except on sections where Trolley Ball or Revolving Disc. Signal stations are provided and are manned by Flagman. The rapid raising and lowering of the Ball or repeated turning on and off of the Disc indicates that a train is approaching and the trolley should be removed from the track.

All Cabins must exhibit hand signals for the guidance of the Motor Trolleys. Where spring Switches are provided they should be treated as obstruction when not set in favour of the trolley. Cabinmen should exhibit hand danger signal.

Motor Trolleys cannot operate the, Springs switches in trailing direction hence they should be lifted when the switch in the trailing direction is not set on the trolley.

When passing through a station/yard or over points and crossing or turn-out the speed of the Motor Trolley shall not exceed 15 km.p.h.

When a number of Motor Trolleys follow one another on the same line clear the Station Master taking line clear must specify the number and obtain just as many Private Numbers from the other station. The station receiving the trolley shall not close the line unless all the trolleys have reached the station. The token Tablet on single line section will be carried by the last trolley. Where no tangible line clear authority is available a certificate shall be obtained from the last trolley before closing line.

When entering a busy yard Station the Motor trolley in harge should drive cautiously and at a speed slow enough to stop instantaneously in case of emergency.

On Single line sections, the tangible authority to proceed shall be delivered to the last Motor Trolly following.

General Rule and General Restrictions for 120 Tonnes B.G. Diesel Orton Crane.

General information and restriction of 120 tonnes B. G. Diesel Orton Crane (to Crane Diagram No. 1 WD 120 CR and having a maximum axle load of 21-94 onnes.

The movement of the above crane shall be subject to the following restrictions and maximum permissible speeds on various sections, as indicated herein below—

(1) **General restriction—** (i) During transit when hauled in a train with the cross in running order, the jib of the case shall fullly rest on match track.

(ii) The cranes shall not be moved with loads on Bridges with girdes and substructures built to BG/BL standard.

(iii) During operation at site, when travelling on its own power with loads.

(a) The jib should normally be brought paralled to the track. But when this is not possible, the jib can be kept at an angle to the track.

(b) If the track is laid with ralls lighter than 90 B, and the load is 10 tonnes and above the crane is not allowed to move.

(c) When the load is 10 tonnes or above, the crane should be allowed to move only after ensuring that all the sleepers are sound and fully packed to correct cross and longitudinal levels, and that the joint sleepers are sound and well packed. When the jib is at an angle to the track, the crane may move but at dead slow speed.

(d) While standing on a bridge the crane should not be permitted to lift load with the jib at an angle to the track, unless the Chief Engineer's prior permission to do so is obtained in each individual case.

(e) The load should be brought the shortest possible radius.

(f) On bridges, when travelling or its own power with loads, the crane is not permitted in gereral. But in special cases where such movement is required, prior permission of Chief Engineer will have to be obtained.

General information and General restriction of 140 tonnes B. G. Diesel Orton crane to crane Diagram No. IWDH/ 140CR and having a maximum axle lead of 20.0 tonnes.

The maximum permissible speed on various sections are indicated below. The maximum speed is subject to restrictions as was included in Eastern Railway's Jt. Sefety Certificate No. 30/86 and or the speed restrictions which may be inforced in various section from time to time.

(1) **General restrictions:—**

(i) During transit when hauled in a train with the crane in running order, the jib of the crane shall fully rest on match trucks.

(ii) During Operation at site, when travelling on its own power with loads—

The jib should normally be brought parallel to the track. But when this is not possible, the jib can be kept at an angle to the track.

Brake down Cranes

The Crane is not permitted to move on all Sections. It can move only on Section specified below—

Section	Maximum permissible speed for 140 tonnes B. G. Diesel Orton Cranne	
	Durings transit	During operations at site when working under its own power
		With load
	Track (Km. p. h.)	Track (Km. p. h.)

(9) Andal—Sainthia ...	30	12	5	5@
(10) Madhupur—Giridih ...	30	12	5	5

* The speed over singharan Bridge No. 436 at Km. 182.80 (Dn. track) is restricted to 25 Km. p.h. when in transit. The crane is not permitted to operate with load over this bridges.

@ On the bridges over Andal-Sainthia section this crane is not permitted ot operate with.

General Rules and General Restriction for 10-Tonnes B. G. Diesel Cranes (30-0' and 35-0' long jib)—(i) 10-Tonnes B. G. Diesel Crane (30-0' long jib) manufactured by Jamalpur workshops as per R.S.D.O.'s Crane Diagram No. LD/SK-597 and LD/Sk-598 have been permitted to run in regular break down services on various B. G. sections of Eastern Railway at a maximum permissible speed shown against each section subject to observance of all speed restrictions now in force of that may be imposed from time to time and other restrictions stipulated in the safety Certificate No. 146 issued by CE and CME and Director Standards R.D.S.O.'s speed clearance certificate No. SL/CR/SPD/10T/BG, dated 24th March, 1976.

(ii) 10-tonnes B.G. Diesel crane with 35-00' long jib, manufactured by JMP workshop as per RDSO's crane diagram No. 3wd, 10 CR (Act. 1) and RDSO's SK No. LD/SK 594 and LD/SK/ 596 are also permitted to run in regular breakdown service on the sections mentioned below subject to observance of all speed restrictions now inforce or that may be imposed from time to time and other restrictions stipulated in the safety certificate No. 139.

Sl. No.	Section	Proposed maximum permissible speed of 10 tonnes B.G. Diesel Crane with (i) 30'-0'' long jib (ii) 35'-00'' long jib	
		When attached to a train with jib fully resting on the matchtruck (Max. axle load 18.00t)	When travelling on its own power without load or with load varying upto 10 tonnes at 5 m radius (Max. wheel load 25.50t)
(1)	Howrah-Bardhhaman (Via ML/HBC)	Kmph. 60	Kmph. 5
(2)	Barddhaman-Sita-rampur (Via M/L)	60	5
(3)	Barddhaman-Sita-rampur (Via S/L)	50	5
(4)	Sitarampur-Mughal-sarai (Via M/L and GC)	60	5
(5)	Khana-Kiul (Via SRG Loco)	60	5

Additional Restrictions—

1. **During Transmit**—

(a) The crane shall be moved attached to a train with its jib-fully resting on a match truck.

(b) The crane shall be marshalled as per the relevant rules.

(c) The Bridgs shall be to BGML standards. On Bridge the crane should not be permitted to be hauled by locomotives than WG or WDM-2 classes.

(d) The maximum permissible speed of the crane over the following bridges is restricted as below—

(i) Barddhaman—Jhajha (Main Line)—Br. 436 at Km. 182.80 (Dn. track)—25 Kmph.

Br. 643 at Km. 314.37 to 315.15 (Dn. track)—50 Kmph.

Br. 603 Km. 280/3-4—50 Kmph.

Br. 633 Km. 299.05 to 299.29—50 Kmph.

2. During operation at site—

(a) When travelling on its own power without load or with loads varying upto 10 tonnes at 5 m, radius the maximum permissible speed is restricted to 5 Kmph.

(i) The load should be brought to the shortest possible radius. Jib should normally be parallel to the track. Based on the type and condition of formation at the site. Engineer should take adequate precautions to ensure that there is no, settlement of the formation under the working crane.

(ii) During crane working a special watch shall be kept on the condition of fish-plates. Any damaged fish-plates should be replaced before allowing the traffic on the restored track.

(b) Minimum permisslble speed of the crane should be decided by the Chief Engineer of the Section where the tracks laid with lighter than 90-R.

(c) The crane should not be permitted to travel or work on bridge on its own power with or without load, without personal permission of the Divisional Engineer. The Divisional Engineer will, if necessary, obtain the sanction of Chief Engineer.

Joint Procedure Order for smooth operation of trains in graded section to avoid stalling.

AS per RDSO's load tables and some field trails, it has been experienced that 59 BOX'N'- L + MT/42 BCN-L+MT with 5281 / 3657 tones cannot be started on 1:150 gradient and may have difficulties in starting on 1:200 gradient by a single WAG-7 / WAG-5 locomotive.

Therefore working of 59 N-Box/L with 5281 ton load by single WAG 7- and 42 BCN /L +MT with single WAG-5 locomotive is possible only if there is few and short stretches of 1 in 150 gradient and that if the gradient is attacked with maximum permissible speed (or in no case less than 50 Kmph), the load can negotiate the gradient with traction motor continuous current not exceeding more than 750 A (WAG5) & 950A (WAG-7) and speed around 30Kmph.

59 BOX'N'/L + MT with single WAG-7 and 42 BCN/L+MT with WAG-5 locomotive may be worked in STN-JAJ and ASN-PKA section with the following condition.

a) Driver has to pick up the maximum permissible speed before attacking the gradient section.

b) No speed restriction less than 30 Kmph will be imposed by Engg., S&T and TR-D department in the section with 1:200 or steep gradients and in emergency if any such restriction is to be im posed; prior information should be given to Sr. DOM / SR. DEE(OP) so that bankers may be utilized to work the train in that section.

c) All station staff should be counselled for the implication if the train is controlled at the Signals indicated in the enclosures 1,2,3,4 & 5 for different sections/locations.

d) All running staff should be counselled that if due to any reason whatsoever, the train comes to stop on 1 in 150 gradient he should not try to move the train & should ask for relief engine immediately. On 1 in 200 gradient, there may be a possibility for the train to start at a crawling speed and therefore the driver may judiciously decide to ask for relief loco.

The critical locations in the Asansol Division have been identified and the reasons for being critical have been mentioned in the enclosures.

In the enclosures two types of critical locations are given. One table containing most critical location at which signals should always be through and the other table contains critical locations at which the signals should compulsorily be through during bad weathers.

ASN

The Haulage Capacities of different types of locomotives for different gradients are given in the table below:

Haulage Capacities of Locomotives.

(Under normal weather condition)

Gradient → / Types of Loco ↓	1:60	1:80	1:100	1:150	1:160	1:172	1:200
WAG-5	1200	1500	1700	2435	2582	2950	3170
WAG-7	1700	2481	3002	3977	3977	4358	4738
WAG-9	2100	2650	3205	4250	4412	4700	4700

Instructions to be followed

1. Under normal weather condition marginally excess loads may be worked without bankers with proper care by all concerned & making all efforts by keeping signals indicated against each critical locations as through to avoid punctuality loss of Mail/Exp./ passenger trains.

2. The loco pilot will submit written memo to the concerned cabin / yard/ station, else such nemo may be submitted by TLC to Dy. CNL. whenever he feels that there is a possibility of stalling due to loco constraints, if any.

3. Certain locations are such, where during normal (clear) weather also the signals are required to be made through to avoid stalling. Such signals locations are indicated in the enclosure as most critical locations.

4. Locos with isolated traction motors, RSI blocks, auxiliaries etc. are not nominated for working loads**.**

5. Engineering restriction of less than 50 in case of 1:150 section and less than 30 in case of 1:200 gradient section should be imposed in consultations with Sr. DEE (OP)/ASN.
